DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to a device, classified in class 422, subclass 179.
 - II. Claims 28-33, drawn to a method for mounting a fragile structure, classified in class 29, subclass 890.
 - III. Claims 34-40, drawn to a method for preparing a mat structure, classified in class 428, subclass -.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case, the product of Group I as claimed can be made by another and materially different process, such as the one in which the wrapped structure is inserted into the housing without the compressing step.

Inventions I, and III are related as process of making a part of the product and product made. The part of the product of Group I as claimed can be made by another and materially different process, such as the one not requiring the binder.

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions of Groups II and III have different mode of operation, different function and different effect. The method of mounting the fragile structure (catalytic substrate) in the housing is a different function from a method of preparing an insulating mat.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hien Tran whose telephone number is 308-4253. The examiner can normally be reached on Tuesday-Friday from 7:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (703) 308-6824.
